

Surface Proteus T8

cryselco.co.uk/pdx

Non corrosive IP65 surface fittings. Diffuser sealed into poured non removable gasket and secured by quick release polyamide clips.

Steel geartray finished in white and secured by quick release catches. There are nylon support straps for maintenance. Body moulded in light grey GRP. End seals and sealing washers supplied. "F" mark classification. Please enquire for low temperature operation.

Extras - Stainless steel diffuser clips for certain areas where chemical attack could damage standard clips which are in polyamide 6.6 material. Vandal resistant clips also available.

Diffusers - Standard in moulded clear polycarbonate.

Emergency - Three hour maintained integral emergency conversion available. In order to maintain the IP65 rating of the luminaire, all maintained emergency conversions should be integral within the body. If this is not possible due to physical size we will discuss the possibility of a remote box or different gear (e.g. 2 and 4ft twins).

The properties of the plastic used in these fittings may not be suitable for all environments. If in doubt please check.
