

# UPL T8

UPL (view from above)

UPL (view from below)

The UPL range has a curved metal perforated body and internal opal sheet with a clear prismatic sheet on top. The effect is to illuminate upper walls and ceiling whilst also giving an attractive downward effect through the perforations.

The UPL is designed for free suspension from the ceiling (kit supplied allows up to 1250mm suspension). The upward light illuminates high ceilings and can be used to highlight any special architectural features such as apex roofs and arches.

The fitting comes complete with a **2-wire suspension kit**. Optional bracket enables fittings to be joined in a continuous line, please enquire.

## Ordering details and dimensions (mm)

<u>Catalogue number</u>	<u>Lamps</u>	<u>A</u>	<u>B</u>	<u>C</u>	<u>F/C</u>
UPL 236/+	2 x 36w	245	1260	65	1260
UPL 258/+	2 x 58w	245	1555	65	1555
