

Vega LED Panel

cryselco.co.uk/veg

A new lay-in 50w LED panel. The lay-in LED panel is designed to fit into exposed grid ceilings both 15mm and 24mm.

It has an opal PMMA diffuser that is fixed to a silver aluminium frame, and the backing panel that contains the LEDs is also attached to this frame. The LED driver is not attached to the panel but connected by 900mm Live and Neutral cables.

Emergency - Maintained emergency conversions are available.

Recessed LED Panel for Exposed T Bar Ceilings
